The Leapfrog CyberRisk Program
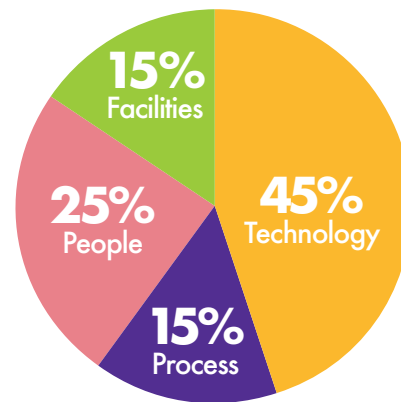

Protecting your company against cyber loss requires more than securing your IT operations

— your people, processes, and facilities need to be part of your risk management strategy. The Leapfrog CyberRisk Program covers all the bases to build a Ring of Security around your entire organization.

A strategic approach to secure all attack vectors

IT infrastructure is less than half of your attack surface. Leapfrog's holistic, programmatic approach:

- Identifies gaps and executes solutions
- Manages and maintains security operations
- Continually integrates emerging cybersecurity requirements

15% Facilities

25% People

15% Process

45% Technology

Risk Strategy

Governance Risk & Compliance

Security Operations

Human Capital

Customized risk management services based on your unique needs and goals

- **Strategy:** Develop security plans and oversee program management
- **Governance:** Architect and manage policy, procedures, processes, and standards
- **Operations:** Monitor and manage constantly and provide IT security staff and consultants as needed

We implement your program in close coordination with your security leadership. If you need risk management leadership, Leapfrog offers a cost-effective Virtual Chief Security Officer (V-CSO) service.

Find out more about how Leapfrog's CyberRisk Program delivers **cybersecurity beyond IT.**
