

# Leapfrog designs, builds, and manages IT that's simplified and secure.

## Secure, high-performing services and solutions

Leapfrog Services is an outsourced MSP and MSSP that helps you meet your business goals by solving your IT problems.

We cover everything in your IT environment — cloud, security, infrastructure, apps, and end-user support — and integrate your systems so they all work together seamlessly. With The Leapfrog Methodology, your IT environment becomes the reliable secure, foundation you need to support your business.

- Optimized and continually managed world-class IT
- Deep bench of specialists in every managed IT area
- CyberRisk Program that covers all attack vectors
- Partnerships with all of the leading technology providers
- Experience with organizations across all industries and on six continents
- SSAE 18 SOC2 and PCI compliant
- Founded in Atlanta in 1998

### Leapfrog clients over the past ten years:

- 96%** say they will continue to partner with Leapfrog for the next 12 months
- 96%** are happy with our after-hours support
- 97%** say Leapfrog is more effective than their in-house IT staff
- 99%** have confidence in Leapfrog security

**“It is no trivial process to change IT providers, but the transition to Leapfrog was incredibly smooth.”**

— CEO, Financial Services Company
